

Design Document for Project 2

Information

Name: Toff Nguyen

ART385

Assignment: Project 2

Due Date: 7 April 2020

Restated Assignment

This assignment has an RGB LED that, when green (inviting) screams (rapidly blinks) red when touched, and vice-versa. It is meant to have a likeness to a prickly person who cannot make up their mind. The user can use the POT value to change the resting state from inviting to warning.
